

Freeze-Dried Fruits & Vegetables

This commercial overview helps buyers prepare an enquiry. The signed product specification and quotation supplied for a selected item are the controlling documents.

Typical Product Options

Product forms	Whole, sliced, diced, crushed and powdered, subject to the selected fruit or vegetable.
Applications	Snacks, cereals, granola, bakery, confectionery, dairy, beverages, seasonings, convenient foods and nutraceutical applications.
Packaging	Typical 5 kg, 10 kg and 25 kg export packs. Eligible custom retail and foodservice packs can be reviewed.
Shelf life	Product-specific; confirmed according to the format, barrier packaging and stated storage conditions.
MOQ	Depends on product, cut, grade, packaging and destination. Include trial and recurring volume.

Specification Points to Confirm

- Product identity, variety and origin
- Cut, particle size, mesh or tolerances
- Ingredients and processing aids, where applicable
- Sensory, physical and microbiological criteria
- Pack material, net weight, labelling and storage
- Destination-market documents and certification scope

Quality & Documentation

Applicable product specification, analysis documentation, batch identification and export documents are coordinated based on the confirmed order.

Important: Availability, values, shelf life, MOQ, certification and destination eligibility are not universal and must be confirmed for the exact product and programme.
